

Mumbi Ventures Group LTD

Mumbi Ventures

| Photography | Videography | Consultancy | Mentorships |
Engineering | Web Design | Farming | Health |

COMPANY SUMMARY

Mumbi Ventures is a Kenyan Owned diverse business, registered with registrars of companies in March 2017, under Companies Act 2015.

With a deeply-rooted love for what we do and delivering the best results possible, Mumbi Ventures is the first port-of-call for business video and photography communications, for both the corporate, private and public sectors.

With today's continuously changing business landscape companies require a different, or perhaps more strategic and interactive approach to business branding and the positioning there of standing above the rest is one of the biggest challenges faced by business, in the niche and saturated markets of today.

We understand the significance of company image and its psychological influence on the target market and how that in return impacts on any company's ROI. So, we take the time to understand your business, and its profiled target market, so as to create the most productive and effective visual outcomes.

Servicing the public and private sectors alike, Mumbi Ventures has also other niche categories and giants like Consultancy, Mentorships, Engineering and construction, Web Design, Farming, and Electrical installation, putting us from the edge to a whole new level.

OWN THE FUTURE

Empowered by numerous milestones — knowledge and insight into an ever-changing business landscape, results in finely-tuned, strategic and interactive solutions to elevate your brand, business, image and thus, reputation.

COMPANY STRATEGY

PURPOSE

Our purpose is to lead in the visual corporate/ industrial communications service industry. We also provide tailor-made visually strategic services for both the NGO and Public sectors.

VISION
